# A breakthrough in Hemostasis testing.

---

## New **ACL TOP Family 50 Series**

Offering the most advanced automation and quality management from routine to specialty assays.

### **Standardized across all ACL TOP systems—for superior performance across your entire testing process**

- **Same** quality results
- **Same** comprehensive reagent portfolio
- **Same** powerful and intuitive software
- **Same** features and usability

### **And now:**

- **Same** assay-specific pre-analytical sample checks
- **Same** advanced lab accreditation support
- **Same** advanced quality management

The *new* ACL TOP Family 50 Series is designed to **minimize errors** and **enhance quality**.

## Completely standardized for advanced automation and quality

Ideal for medium- to high-volume labs, including integrated lab automation systems—routine or specialty testing.

### For high-volume labs

#### ACL TOP 750

Runs more tests in less time—user-friendly and high-throughput for routine analysis in laboratories with the heaviest workloads.

#### ACL TOP 750 CTS

Closed-Tube Sampling adds safety in routine, high-volume and specialty labs.

#### ACL TOP 750 LAS

Connects to laboratory automation tracks for maximum flexibility and efficiency.

	ACL TOP 750	ACL TOP 750 CTS
Throughput (PT/hr)	up to 360	up to 270
Samples onboard	120	120
Reagents onboard	60	60

### For medium- to high-volume labs

#### ACL TOP 550 CTS

For highly automated testing in routine, medium- to high-volume and specialty labs.

Throughput (PT/hr)	up to 240
Samples onboard	80
Reagents onboard	40

### For medium-volume labs

#### ACL TOP 350 CTS

The most compact ACL TOP Family 50 Series system for routine or specialty assays in medium-volume labs. Perfect companion to ACL TOP 750 CTS and 550 CTS systems.

Throughput (PT/hr)	up to 110
Samples onboard	40
Reagents onboard	26

# The ACL TOP Family

## Analyzer automation

- Barcoded reagents
- Continuous onboard reagent-stability monitoring
- Automatic QC frequency execution
- Rerun and reflex testing capabilities
- Fully automated reporting of factor assays with parallelism
- Auto-verification and uploading of results
- Closed-Tube Sampling via cap-piercing (CTS models only)

## Continuous operation

- Continual loading and unloading of samples and reagents via racks with no system interruption
- Uninterrupted cuvette loading and waste disposal

## Simple maintenance

- Daily maintenance, ordered by user and performed by system, in < 5 minutes
- “Maintenance overdue” notifications to alert user
- Remote instrument diagnostics and troubleshooting via web in real time\* (optional)

## Laboratory automation

- Follows CLSI Guidelines (AUTO 1-5) for true “Point-of-Reference” sampling
- Open system compatible with most laboratory automation track systems
- Eliminates need for costly and slow robotic interface

## Fast turnaround

- Up to 360 PT/hr
- PT results from standby in approximately 3 minutes
- Samples loaded on any rack, in any position, at any time, including STAT

\* Not available in all countries.

**Onboard barcode reader allows real-time reagent management.**

**Closed-Tube Sampling enhances safety in the testing process.**

# The ACL TOP Family 50 Series

## Automated pre-analytical sample integrity checks

- Detects interference from Hemolysis, Bilirubin or Lipemia
  - Values exceeding assay-specific thresholds are flagged
  - Pre-set to validated thresholds with optional customization
- Detects tube-fill height issues
- Flags abnormal sample aspiration, prompting user to check for clots

## Advanced quality and accreditation support tools

- Most comprehensive set of audit-trail tools available
- Time, date and operator stamps for all analyzer functions and activity
- Maintenance, QC and calibration logs, and temperature report
- Comprehensive and secure one-click audit reports

## Enhanced system security

- Second-level password and electronic signature
- Automatic system log-off
- System-access restriction with user-specific log-in and password
- Automatic password expiration
- Comprehensive 21 CFR Part 11 support tools
- Optional user-access restriction to patient-demographic information

# Comprehensive assay menu for disease state management

## HemosIL assays

**ACL TOP Family 50 Series systems** are optimized to operate with a comprehensive panel of HemosIL assays. Together, they are a complete disease-state management solution. Innovative **HemosIL assays**, routine to specialty, help guide pathways for better patient care that can reduce costs associated with hospital length-of-stay and therapeutic management.

**True standardization throughout the lab for routine and specialty assays on all ACL TOP systems**

\* Not FDA cleared. Not saleable in the U.S. | ◆ Liquid, ready-to-use format.

### ◆ Increased efficiencies with HemosIL liquid, ready-to-use assays

- The great majority of Hemostasis tests performed in laboratories today are comprised of PT and APTT; therefore, their efficient use is essential.
- HemosIL high-sensitivity, liquid, ready-to-use assays are available for PT, APTT, D-Dimer, Anti-Xa and more.
- These assays deliver efficiency by:
  - Eliminating reconstitution errors for more accurate results
  - Eliminating extra pipetting steps for increased efficiency
  - Reducing labor utilization overall

Significant Reduction in Hands-on Tech Time for Vial Reconstitution\*

**Reduced by ≈ 65%\*\***

\* Data on file, IL.

\*\* Assumes high-volume, routine testing with PT, APTT, D-Dimer and Fibrinogen assays.

NEW

**ACLTOP**  
Family 50 series

## A **new** breakthrough in Hemostasis testing

ACL TOP Family 50 Series systems are the first in Hemostasis testing to automate and integrate:

- Pre-analytical sample integrity checks
- Advanced quality management
- Lab accreditation tools

**ACL TOP Family 50 Series. Advanced automation and quality for lab efficiency and better patient care.**

# ACL TOP Family 50 Series standardizes the Hemostasis testing process—for flexibility, efficiency and enhanced patient care
